

WHAT IS SOFTLAYER?

SoftLayer, an IBM company, provides cloud Infrastructure as a Service (IaaS) based on bare metal servers. Supported by a global network of data centers secured to the highest level, bringing together on demand dedicated computing resources in a pay-as-you-go model. SoftLayer provides the platform for service expansion and supports your business growth. Sit behind the controls and build your cloud, exactly how you want, as granular and specific as you need with rhipe.

DATA CENTERS

Each is built to the same spec and equipped to provide the full SoftLayer catalog of services.

NETWORK

A global network backbone where public, private and management traffic travel across separate network interfaces.

CONTROL

Every offering is controlled by a single management system with its own API through SoftLayer's web portal and mobile apps.

PRODUCTS & SERVICES

SERVERS

Bare Metal (Dedicated) Servers | Raw horsepower for intensive workloads
Virtual Servers | Flexible, scalable cloud compute resources
Software | Comprehensive library of OS, virtualization & DB options

SECURITY

Software | Intrusion protection, detection & prevention software
Firewalls | Shared, dedicated & high availability security appliances
SSL Certificates | Security against unauthorized data interception
Compliance | Extensive controls, reports, audits & certifications

NETWORKING

Load Balancing | Local, global & high availability load balancers
Network Appliances | Software-defined, all-in-one networking solutions
Direct Link | Secure, private connectivity to on-premises resources
Domain Services | Registration & administration of top-level domains

STORAGE

Block Storage | Powerful iSCSI-based storage with SAN persistence
File Storage | Durable NFS-based storage in a NAS environment
Object Storage | Scalable object storage based on OpenStack Swift
Backup | Reliable automated backup services from EVault & R1Soft
Content Delivery Network | Global network of nodes to distribute content

DEVELOPERS

API | Granular systematic access to all SoftLayer services
Email Delivery | Email service with superior delivery rates & analytics
Message Queue | Cost-effective application messaging & notifications
Digital Transcoding | Convert audio or video assets into various sizes & formats
SL Development Network | All the SoftLayer API information you need

MANAGEMENT

Controls | Single set via API, Web portal or mobile application
Monitoring & Reporting | Standard & advanced options
Management Tools | Streamline & automate complex processes
Managed Hosting | Unparalleled 24x7 management of core services
Support | Unlimited access to technical experts at no additional cost

RHIPE IS THE CLOUD CHANNEL COMPANY.

We provide our partners with a complete end-to-end cloud solution, helping them to grow and thrive in the emerging Cloud economy. As the Cloud 1st, channel 1st company, rhipe is recognised as the leading expert in subscription software licensing in Asia Pacific. Our key software vendor relationships include those with Microsoft, IBM, VMware, Citrix, DataCore, Red Hat, Trend Micro, Veeam and Zimbra. We sell and manage subscription software from these vendors to over 1600 channel customers with value-add services including business transformation consulting, marketing and lead generation, order processing, license optimisation and compliance consulting.
